[Libraries](#) [GMail](#) - [CV](#)

Open-source enthusiast and in love with Python, JS and Linux. Long undergoing user experience with variety of GNU/Linux distributions, almost 7 years now. Experience in Python, at the beginning as system administration scripting language besides Bash and later on got into Desktop and back-end development. Highly skeptic towards "Is NodeJS a hype ?" theory. I think it's here to stay and it's most certainly the future of web development, thus I'm adapting ! just got recently into the back-end of JS and I'm still in awe. Nevertheless my front-end experience's much longer and more mature.

## I. Education:

1. Bachelor Software Engineering - Limkokwing University ( 25/08/2017 )
2. Masters Software Engineering - Limkokwing University ( *Undergoing* )

## I. Experience:

- I. *Freelance* : With the Saudi investment bank to develop UI for a game show ( 01/03/2017 ) ( [Source](#) )
- II. *Internship* : With compos-dz Algerian startup to develop web-based queue management system ( 05/09/2017 ) ( [Source](#) )

## III. Open-Source:

- I. *Safelock* : Python based AES files encryption Desktop application, rated 3.5/5 on ( [Softpedia](#) ), more than 1000 downloads on ( [Taimienphi](#) )
- II. *AudioSequence* : jQuery based module to ease the task of repeating audio elements and managing them in playlists. ( [NPM](#) )

## III. Experienced with:

Python3/2 - SQLAlchemy - Flask - Flask-SQLAlchemy - Flask-RESTful - Flask-Admin - Flask-WTF - Sanic - PySide - PyQt - Click - Gevent - Asyncio - Trollius - multiprocessing - PyCrypto - PyUSB - python-escpos - PyInstaller - BeautifulSoup - unittest - SQLite - SQLCipher - Javascript - jQuery - jQuery-UI - Animated.css - Bootstrap - NodeJS - NPM - Webpack - ReactJS - React-Bootstrap - React-Router - Next.js - PhantomJS - GNU/Linux - Bash/Batch Script
